WHO WE ARE

Talis Transcontinental Limited brings local knowledge, technical expertise and international partnerships to projects across Mining, Oil & Gas, Defense and Construction. We support public- and private-sector clients with professional services, dependable execution and solutions shaped around their operational needs.

Incorporated in Nigeria in 2013, we have built our company around integrity, professionalism, innovation, safety and excellence. Our multidisciplinary approach helps us understand each client's priorities and bring together the people, resources and expertise their projects require.

FOUR SECTORS. ONE COMMITMENT.

Mining, Oil & Gas, Defense and Construction.

Strong relationships are central to our work. We build long-term partnerships with clients, contractors, suppliers, government institutions and other stakeholders, with a focus on measurable value and shared success.

Across all four sectors, we continue to invest in technical capacity, strengthen our partnerships and explore opportunities that contribute to national development and economic growth.

OUR CORPORATE IDENTITY

Talis Transcontinental Limited is a Nigerian company incorporated in 2013 and registered with the Corporate Affairs Commission under RC No. 1150882.

Our purpose is straightforward: deliver dependable solutions, uphold professional standards and create lasting value for our clients and partners.

We combine a forward-looking approach with a commitment to excellence, building trusted relationships across the industries we serve and contributing to communities and the Nigerian economy.

01

INTEGRITY

Professional standards

We uphold professionalism and build lasting relationships with clients and partners.

02

EXCELLENCE

Dependable solutions

We bring technical expertise and a commitment to quality to client operational needs.

03

PARTNERSHIP

Local and international

We combine local knowledge with international expertise to create lasting value.

01 / MINING

Talis Transcontinental Limited, through its subsidiary Regoil Limited, has established a presence in Nigeria's mining and mineral exploration sector, with a focus on identifying and developing commercially viable mineral resources.

Between 2015 and 2016, Regoil Limited was awarded five exploration licences covering areas with a history of artisanal mining activities and indications of significant mineralization. These areas have provided opportunities for further geological investigation and systematic exploration to better understand their mineral potential.

The mineral resources identified across the exploration areas include Gold, Tin, and Sapphire. Building on the indications from previous activities, the company is undertaking a structured and comprehensive exploration program designed to evaluate the geological characteristics, mineral occurrence, grade, extent, and overall development potential of the concessions.

Our exploration activities are focused on applying appropriate geological and technical methodologies to generate reliable data that can support future resource development and investment decisions. As exploration progresses, we remain committed to responsible resource development, sound operational practices, and compliance with applicable regulatory requirements.

Talis Transcontinental Limited's objective is to advance these exploration assets toward commercially viable mining concessions, subject to the outcome of ongoing exploration, technical evaluations, regulatory approvals, and the required development processes.

Through our continued investment in mineral exploration and technical capacity, we are contributing to the growth of Nigeria's mining sector while unlocking the economic potential of the mineral resources within our areas of operation.

02 / OIL & GAS

Talis Transcontinental Limited has developed significant experience in Nigeria's oil and gas sector, with a particular focus on Exploration and Production (E&P) advisory, strategic partnerships, and the development of indigenous participation within the industry.

Since our inception, we have worked closely with indigenous oil and gas companies, providing advisory and business support aimed at facilitating access to suitable international E&P partners for oil and gas concessions. Through our industry relationships and sector knowledge, we have supported a number of indigenous companies in identifying and engaging potential international partners for the development of their upstream assets.

Our network includes relationships with 23 indigenous oil and gas companies holding E&P concessions within the Niger Delta, one of Nigeria's principal hydrocarbon-producing regions. These relationships provide a strong platform for collaboration, technical engagement, investment opportunities, and the development of strategic partnerships across the upstream value chain.

Our role extends beyond conventional consultancy. We are facilitating meaningful collaboration between indigenous asset holders, international investors, technical partners, and other industry stakeholders, helping to create opportunities for the responsible development of oil and gas assets.

Looking ahead, Talis Transcontinental Limited is positioning itself to expand its participation in the upstream oil and gas industry, with plans to transition from an advisory and facilitation role into direct Exploration and Production (E&P) operations, subject to the appropriate commercial, technical, and regulatory requirements.

We also intend to develop capabilities within the oil trading and energy commodities space, creating opportunities to participate across multiple segments of the oil and gas value chain.

Our Oil & Gas Exploration and Production (E&P) business is anchored on a strong understanding of Nigeria's upstream petroleum sector and a well-established network of relationships with indigenous oil and gas companies, investors, and international E&P partners.

Since our inception, we have played a strategic advisory and facilitation role in the development of indigenous participation within the Nigerian oil and gas industry. We provide specialized support to indigenous companies seeking to attract credible international technical and financial partners for the development, acquisition, financing, and optimization of oil and gas assets and concessions.

Over the years, we have supported numerous indigenous oil and gas companies in establishing relationships with reputable international E&P partners, helping to create opportunities for technical collaboration, investment, asset development, field operations, and long-term commercial partnerships. Our experience and industry network provide us with valuable insight into the dynamics of the Nigerian upstream sector, particularly the opportunities associated with the prolific Niger Delta region.

We maintain strategic relationships with a significant number of indigenous oil and gas companies holding exploration and production interests and concessions within the Niger Delta. Through these relationships, we continue to identify and facilitate commercially viable opportunities across the upstream value chain, while promoting partnerships that combine local knowledge and ownership with international technical expertise, capital, technology, and operational capabilities.

Our approach is built around partnership, integrity, technical competence, commercial value, and sustainable development. We seek to connect the right opportunities with the right partners, creating mutually beneficial structures capable of delivering long-term value to asset owners, investors, technical partners, host communities, and other stakeholders.

We are strategically positioned to transition from our established E&P advisory and partnership facilitation activities into direct participation in exploration, field development, production, asset acquisition, and petroleum trading. Our objective is to build a sustainable and competitive presence across the oil and gas value chain, leveraging our local industry relationships, market knowledge, and access to strategic partners.

As we expand our upstream portfolio, we remain committed to supporting the growth of Nigeria's indigenous oil and gas sector, facilitating responsible resource development, and contributing to the sustainable advancement of the Nigerian petroleum industry.

KEY AREAS OF FOCUS

- 1 Oil & Gas Exploration and Production
- 2 Upstream Asset Acquisition and Development
- 3 Indigenous-International E&P Joint Ventures
- 4 Technical and Financial Partner Sourcing
- 5 Field Development and Production Opportunities
- 6 Strategic Investment and Project Development
- 7 Crude Oil Marketing and Trading
- 8 Upstream Project Structuring and Commercial Advisory
- 9 Local and International Stakeholder Engagement

Our vision is to evolve from a trusted E&P advisory and partnership facilitator into a fully integrated upstream energy company with meaningful participation in exploration, production, asset development, and oil trading.

03 / DEFENSE

We help government institutions, government agencies, international organizations and private-sector clients access specialist defense, security, procurement and construction solutions. Through reputable international partners, we source products, technologies, expertise and professional services suited to each client's operational requirements.

Our network includes security and defense companies from the United Kingdom, United States, South Africa and other strategic markets. Their experience spans the Middle East, Central Asia, Africa and other regions, giving our clients access to reliable, compliant and fit-for-purpose support.

Protecting people, critical infrastructure, strategic assets and high-value operations calls for the right expertise. We work with experienced international partners to provide equipment, technologies, consultancy, logistics and specialist support to authorized government and private-sector clients.

Our capabilities include:

- 1 Defense and security equipment procurement
- 2 Security technology and systems integration
- 3 Protective and operational equipment
- 4 Transportation and maritime security solutions
- 5 Port, terminal, and critical-infrastructure security
- 6 Intelligence, information gathering, and analytical support
- 7 Surveillance and situational-awareness technologies
- 8 Security logistics and specialized support services
- 9 Training, technical assistance, and capacity-building solutions

Every engagement is shaped around the client's operational needs, applicable regulations and relevant international standards.

04 / CONSTRUCTION

We bring qualified technical partners, contractors and engineering firms together to support construction and infrastructure delivery. Our work connects project requirements with the expertise and resources needed to move them forward.

We support opportunities for government institutions, intergovernmental organizations, corporate clients and other public- and private-sector entities. Our role is tailored to each project and may include sourcing, strategic partnerships, procurement, contractor coordination, facilitation and delivery support.

Successful infrastructure delivery depends on careful planning, technical expertise, reliable supply chains, strong project management, regulatory compliance and disciplined execution. We bring together the technical and commercial partners each project needs.

- 1 Government and institutional construction projects
- 2 Infrastructure development
- 3 Civil and building works
- 4 Project facilitation and coordination
- 5 Engineering and technical partnerships
- 6 Construction procurement and supply

Our international relationships connect Nigerian and African opportunities with companies offering specialist technologies, technical expertise and project experience.

By combining local understanding with our partners' technical and operational capabilities, we create solutions that respond to local requirements and draw on international expertise.

We build sustainable relationships that create value for clients, partners and stakeholders while supporting Nigeria's security, infrastructure and industrial development.

OUR COMMITMENT

Professionalism, integrity, confidentiality, regulatory compliance and accountability guide every engagement. For sensitive defense and security requirements, we work with reputable partners and support legitimate, properly authorized activities.

Across mining, oil and gas, infrastructure and specialist construction, we bring together local knowledge, international partnerships, technical expertise and disciplined project execution. As we grow, these commitments remain at the heart of how we serve our clients.

PROFESSIONALISM. INTEGRITY. ACCOUNTABILITY.
